¹ All data for FYE 6/30/2013 include private investment NAVs as of and returns through 6/30/2013.

 2 Sharpe Ratio: The amount of return over the risk-free rate that can be expected for each unit of risk accepted. To calculate this number, the formulas in section F subtract the average T-bill return (risk free return) from the portfolio's average return and then divide by the portfolio's standard deviation. The average risk-free rate for the time periods shown above were 0.03% for trailing 3 years, 0.07% for trailing 5 years and 0.43 for trailing 10 years, all ended 6/30/2013.

³ Effective July 1, 2013, the Committee recommended approval of a total spending rate reduction from 6 percent to 5 percent for institutions currently receiving the endowment 4.5 percent spending and 1.5 percent management fee. Within the 5 percent spending rate, the institution will have the discretion to allocate proceeds between spending and management fee, of which a maximum of 1.5 percent may be allocated to the management fee.
